

# Plate-forme d'intégration continue - <https://ci.inria.fr>

The screenshot shows the Inria Continuous Integration portal interface. At the top, there is a navigation bar with the Inria logo, 'Continuous Integration', and menu items: 'Dashboard', 'News', 'Projects', 'Users', and 'CI Softwares'. A user profile dropdown for 'vincent.rouvreau@inria.fr' is visible on the right. The main content area is for the 'gudhi' project, which is marked as 'Public' and 'Active'. It displays the 'Project Id: 378' and 'Fullname: Gudhi', with 'Edit' and 'Delete' buttons. A 'Description' box contains the text: 'Geometry understanding in higher dimension'. Below this are five colored tiles: 'Slaves' (3), 'Members' (3 Member(s)), 'Manage jenkins' (Production version: 1.580.2, Qualification version: 1.580.2, Previous version: 1.580.2), 'Logs' (Project logs), and 'Jenkins dashboard' (Jenkins dashboard). At the bottom, there are links for 'Documentation' and 'Contact us', and a 'Back to top' link. The Inria logo is also present in the bottom left corner.

- Plate-forme d'intégration continue pour projets de développement (Forge INRIA, github, ...)
- Machines virtuelles de compilation, intégration, ... (Windows, Linux, MacOS)
- Execution de scripts automatiques via Jenkins
- Gestion des utilisateurs et de leurs droits via un ou plusieurs administrateurs
